

Proactive Care Management

Help Them Live Healthier Longer

About half of all adults, or roughly 117 million people, have one or more chronic conditions, and account for 84% of all health care spending.* These chronic conditions are largely managed reactively – action is taken only when the individual becomes very ill – resulting in health crises and hospital readmissions.

Numeria Team Care provides ongoing visibility to an individual's state of wellness, allowing the monitoring center, care team, or friends and family to promote sustained engagement or proactively intervene, helping them live healthier longer.

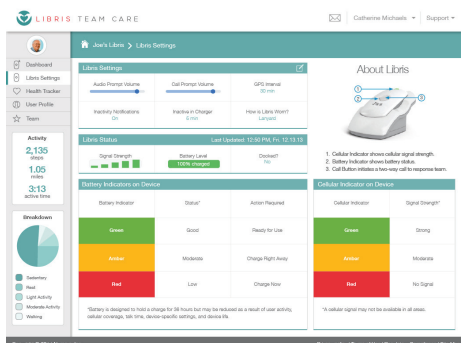

Populate Numeria Team Care with timely, objective measurements, activity data, location information and fall events, collected virtually anywhere through Numeria Libris+, a combined mPERS and telehealth device.

Team Care's user-friendly interface provides a more comprehensive view of an individual's health and device status, and sends alerts for out-of-parameter readings, leading to improved overall care management.

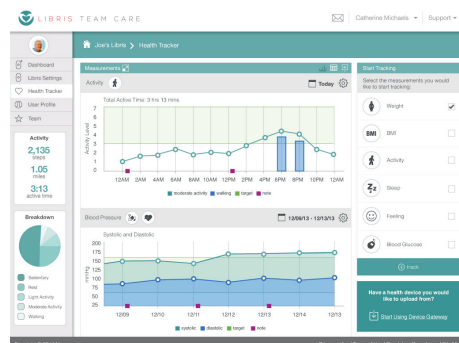

Numeria's partner relationships, training and development resources ensure a quick ramp-up as you establish your telehealth program.

- » Provide greater visibility to an individual's ongoing state of wellness
- » Detect opportunities for intervention before they become crises
- » Reduce the financial burden on families and health systems
- » Promote sustained engagement of the individual and care team

(Future functionality)

Monitor and manage device status

Patient-centered health reports

One Mobile Solution

Safety Combined with Personal Health Monitoring

Nuera Libris+ combines the capability of a well provisioned mobile Personal Emergency Response System (mPERS) with telehealth, an ideal solution for active-well seniors and those needing chronic disease management.

An industry first, this next-generation mPERS platform provides safety, security and the ability to upload health measurement data in one small, easy-to-wear mobile solution.

Data is uploaded via Libris+, through Nuera's secure, FDA-cleared platform, and into any monitoring center's health management application—or Nuera Team Care—where it can be viewed and acted upon according to defined protocol.

Specifications

- *Wide Area Cellular Connectivity: 2G GSM & 3G WCDMA*
- *Automatic Fall Detection Sensors: On-board sensors for free-fall and 3-dimensional space analysis using proprietary algorithms*
- *Fall Detection Analysis: Fall detection identification using cloud-based proprietary algorithms and class libraries*
- *Location Service: On-board Global Positioning Services (GPS) and mobile network Location Based Services (LBS)*
- *Audio: Full duplex speakerphone; providing communication up to 1 meter from device*
- *Manual Alert: Mechanical touch button activates voice call and simultaneous data transmission to call center*
- *Local Area Connectivity: Bluetooth EDR 2.1*
- *Environmental:*
 - *Highly water-resistant; designed to be worn in the shower or bath. Submersible up to 1 meter for 30 minutes. (IP67 rating).*
 - *Shatter-resistant from 2 meters (IK06 rating)*
 - *Operational at temperatures from -20°C to 60°C*
 - *Charging temperature range 0°C to 40°C; Environments exceeding 40°C could slow or interrupt normal charging cycle*
- *Battery: 36-hour battery life; battery life may be reduced as a result of user activity, cellular coverage, talk time, device-specific settings, and device life*
- *Dimensions: 66 x 40 x 19mm (without clip)*
- *Utility: Can be worn on lanyard or belt*
- *Color: Available in charcoal grey and off white*
- *Weight: 49g*

- › Next-generation mPERS with telehealth
- › Instant hands-free, two-way voice communication
- › Market-leading proprietary fall detection algorithm
utomated fall detection
- › Location services
- › Instructive voice prompts
- › Highly water-resistant and impact-resistant
