

Easy Introduction

11 new DSC keypads & screens,
3 new POWERSERIES control panels

Value Surge:

The new POWERSERIES platform offers more than 100 additional standard features, resulting in unparalleled value in the industry.

Compatibility & Change:

- Fully backward compatible with all existing POWERSERIES technology
- Same warranties apply to all products
- Original POWERSERIES line and support remain available

Retraining Not Required:

If you're already familiar with POWERSERIES, our next-generation platform will be an easy transition for you. Despite the addition of a number of value-added features, traditional programming remains unchanged, as does the installation process.

Optional Technical Training Available:

For those new to POWERSERIES, technical training is available online, at key industry tradeshows (ISC West), on CD and through seminars with participating distributors. Training is recommended for those who would like to familiarize themselves with the new features or meet new listing requirements such as SIA CP-01, DD-243 and EN-50131-1/3.

DSC continues to set the global standard for contemporary, good-value control panels, keypads and screens.
